

Specification amendment

The Specification is objected to for referring to FIG. 5 when there is no such figure now in the case. As noted in the response under "Drawing amendment", FIG. 4, as described in the Specification (page 4, lines 6-7) was inadvertently omitted from the Application filing and FIG. 5 was mis-labeled as FIG. 4. FIG. 4 has been enclosed as required by the Office and the figure previously designated as FIG. 4 has been re-labeled as FIG. 5. The figures as currently submitted provide the figures referred to in the Specification.
